

GIOVENZANA
INTERNATIONAL B.V.

Amsterdam, 07.08.2023

DIRECTIVE REACH n.1907/2006 - Substances of Very High Concern "SVHC" to Candidate List updated 14.06.2023 – 235 substances

The European Commission has ordered the regulation on chemicals, called REACH (Registration Evaluation and Authorization of Chemicals) entered into force on 1 June 2007 (and subsequent updates). All substances produced and / or imported in the member countries in quantities exceeding 1 ton per year, even if supplied in mixtures or preparations must be registered in agreement with this European regulation. To qualify for transitional periods provided by REACH all of the substances which meet the above requirements will then be pre-registered by Dec. 1, 2008.

Giovenzana International B.V. is not subject to registration of its products because:

- Their products are not even substances and preparations containing substances but are articles as defined in REACH;
- Does not produce or import from countries outside the European Union chemicals or products containing SVHC chemicals;
- Place of business of assembling articles that under normal or foreseeable conditions of use does not emit substances above 1 ton/year;
- Articles does not contain substances among those considered of greatest interest – SHVC.

Giovenzana International B.V., to ensure proper compliance with all obligations under REACH, is conducting its suppliers at the gathering of information and the necessary checks on the registration of chemicals and preparations containing chemicals used in their own activities.
